

# Research opportunity: Are you an adult in the UK with Primary Ciliary Dyskinesia (PCD)?

**Our Goal:** To learn more about fertility experiences, support available and pregnancy outcomes for men and women with PCD in order to improve care in the future

We are asking **everyone** over 18 years old with likely or confirmed PCD to take part

## What is involved?

Complete short online study questionnaire

Share your PCD medical information with study researchers (optional)

To find out more and participate in this study please use web address or scan QR code:
